

THE DAY E.T. BOARDED THE SPACE SHUTTLE

BY GERALD BARNES

A FORMER NASA employee has just revealed that he witnessed two American astronauts meeting an extraterrestrial during a Space Shuttle mission.

Space Craft Operator Clark McClelland worked for the space agency from 1958 to 1992, assisting with the Mercury, Gemini, Apollo, Apollo-Soyuz, Skylab and Deep Space Missions, as well as overseeing launches of the space shuttle and the International Space Station programs.

McClelland recently revealed an encounter he witnessed on 27-inch video monitors while manning the Kennedy Space Center Launch Control Center (LCC).

A strange, triangular craft surrounded by a hazy field hovered behind the open bay doors of the space shuttle while an alien being interacted with two NASA astronauts.

"It was a tall creature, about 8 to 9 feet tall," reveals McClelland, who unveiled an artist's conception of the meeting on his Web site, www.stargate-chronicles.com.

"It had a humanoid body shape with two arms, two hands, two legs, two feet, a slim torso and a normal size head for its size.

"The helmet was not as large as our two NASA Astronauts, and had a viewport to look forward."

McClelland couldn't hear any communication between the astronauts and the humanoid. He says the creature had a small device that could have been a kind of communicator attached to the side of its helmet, but also waved its arms around as if giving instructions.

Although our astronauts were tethered to

Did you know?

Apollo astronaut Edgar Mitchell, the sixth man to walk on the moon, has publicly declared that the government is covering up the truth about UFOs.

their shuttle, the alien appeared to be moving freely and had no oxygen tanks.

"The color of its skin I could not determine," McClelland recalls. "It appeared to have two what appeared to be eyes, but it was not detailed enough for any other comments."

The NASA veteran later heard from a friend who, during a different mission, observed an 8- to 9-foot-tall extraterrestrial inside the space shuttle crew compartment.

Both missions were sponsored by the Department of Defense and given top secret classification.

UFO researchers say McClelland's story fits in with other information the government tried to keep secret.

British hacker Gary McKinnon broke into government computers and found Pentagon and NASA files that listed "non-terrestrial officers" involved in "fleet-to-fleet transfers."

Ufologists point out that McClelland comes from an unimpeachable background as a space scientist, and his account is consistent with what we already know about secret government projects involving UFOs.
